What is Dysphagia?
Some people have trouble swallowing when drinking and/or eating. Having trouble swallowing is called dysphagia. Signs to look for are coughing, choking, gurgly voice or having food stick in your throat when you eat or drink.

When you have dysphagia, you will need to make changes to some of your foods and drinks to make swallowing easier and safer for you.

In this handout, you will learn about:
- the best food texture for you
- foods and fluids that are easier to swallow
- foods and fluids that can cause choking
- thickened fluids and other types of fluids you can have

Which food texture is best for me?
In addition to thickened fluids, it is recommended that your foods be pureed.

See the chart in this handout for your list of foods allowed and foods to avoid

Notes:
Recipes

SMOOTHIE

3 cups whole milk
2 - 38 g package Carnation Instant Breakfast®
1 - 102 g package vanilla instant pudding powder
½ cup instant skim milk powder

Put all ingredients in a blender and blend at low speed for one minute. Can be stored covered in the refrigerator for up to 3 days.

KATY DRINK

½ package or 3 oz Jello® powder, any flavour
1 cup boiling water
1 cup pureed fruit
½ cup low fat, plain yogurt

Why are fluids important to me?

Your body needs fluids to function properly and prevent dehydration.

You will need to have thickened fluids to make your swallowing easier. Sometimes, people on a thickened fluid diet do not take enough fluids because the thickened fluids are filling and not always enjoyed as much as thin fluids. Some people lose the feeling of thirst even when their body needs fluid.

You need to have 6 to 8 cups of thickened fluids every day to prevent dehydration (1 cup = 8 oz).

How can I make fluids easier and safer to swallow?

Thicken your fluids to make the texture like:

- nectar – thick
- honey – thicker
- pudding – thickest

There are 2 types of thickened fluid products:

1. Fluids that come already thickened. Examples include:
   - Resource Dairy Thick®
   - Resource Thickened Juice® (such as apple and orange)

2. Powders that you use to thicken fluids*. Examples include:
   - Resource ThickenUp®
   - Kingsmill Quick Thick®
   - Oetker UltraThick®

*follow the instructions on the package

Ask your health care provider where to purchase these products.
Can I drink water, coffee and tea between meals?

☐ No
  Do not drink water, coffee or tea.
  Keep your mouth moist by using:

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

☐ Yes
  Take water, coffee or tea from a **teaspoon**.
  Swallow after each spoonful.

Can I drink water during a meal?

☐ No
  Do not drink water during a meal.

☐ Yes
  Follow these steps to decrease the chance of food and/or fluids going into your lungs:
  1. Clear your mouth of all food and fluids.
  2. Swallow twice without food or fluids in your mouth. This is a dry swallow.
  3. Take water from teaspoon and swallow. Repeat step 3.
  4. Once these steps are done you can take water, coffee or tea from either a teaspoon or a cup as indicated on page 5.

Can I drink from a straw?

No.
It is more difficult to control the fluid in your mouth and throat when you use a straw.

What are some tips to help me swallow easier?

Eat in a calm and quiet place. Avoid busy restaurants and turn off the TV.
Moisten foods by mixing with:
  • smooth gravy or sauce
  • broth
  • butter or margarine
  • mayonnaise
  • sour cream
  • yogurt
