A Cancer Care Ontario regional partner

Welcome to the Juravinski Cancer Centre

Patient and Family Handbook

"Riding the Dragon" A Cancer Journey | by Conrad Furey

Thank you to our patients and families, staff and volunteers who provided comments and suggestions for this handbook.

Juravinski Cancer Centre
699 Concession Street
Hamilton, Ontario L8V 5C2
www.jcc.hhsc.ca

Being told you have cancer brings with it fear and uncertainty. These feelings may make it difficult for you to know what to expect and what to do.

This handbook is a guide for you during this stressful time. In it you will find information about what to expect when you come to the Juravinski Cancer Centre (JCC) for your cancer care. We hope that the handbook answers many of your questions. Please visit our website: www.jcc.hhsc.ca for more information.

We are here for you and your family and encourage you to take an active part in your care. As you go through your treatments and appointments here at the JCC, be sure to ask any questions you may have along the way.

As part of the Hamilton Health Sciences' family of hospitals and in partnership with St. Joseph's Healthcare Hamilton, McMaster University and Mohawk College, the Juravinski Cancer Centre is a world leader in education, research and cancer care. Our health care providers, staff and volunteers are the people you can turn to for information, treatment, care, and most importantly, hope.

W. K. (Bill) Evans, MD, FRCPC
President, Juravinski Cancer Centre
at Hamilton Health Sciences

Getting started

There is a lot to learn when you first get started with your cancer care and treatment. Before you begin it is a good idea to get to know a bit about the JCC, the types of treatments and services for cancer, and the health care team who will help you through this journey.

The JCC is right next door to the Henderson General Hospital in Hamilton. It is part of the Hamilton Health Sciences' family of hospitals. See the website: www.hamiltonhealthsciences.ca

You may need to go to the Henderson General Hospital for tests and other needs. Currently, the hospital is under construction so it is a bit confusing to get to places. Do not worry. We have maps, directions and many volunteers to help and direct you.

The JCC works closely with other community hospitals and clinics to provide cancer care and services throughout the region. These hospitals and clinics are located in Brant, Burlington, Haldimand, Hamilton, Niagara and Norfolk.

Getting to the JCC

Driving and parking

You may not be able to get to your appointment on your own. This is a time to ask a family member or friend to help you. Not only can they drive you, but can be with you during your appointments.

Please allow yourself plenty of time to park. For most, if not all of your appointments, you will need to pay the daily maximum rate. Call 905-521-2100 ext. 42354 or visit www.hhsparking.com for parking rates. If you have more than 15 appointments there is a monthly pass for a slightly discounted rate. You can buy a monthly parking pass in the office at the parking garage on Concession Street across from the hospital.

Map, directions and parking information are on pages 35 to 41.

Volunteer drivers

The Canadian Cancer Society offers a transportation service to those who may have no other means of getting to cancer related appointments. To see if you are eligible for this service call your local Canadian Cancer Society office or the Cancer Information Service at 1-888-939-3333. Transportation is a busy service, so please give at least 2 full business days notice.

Ambulance

You may need to come to your appointment in an ambulance. This does not happen often, but if you do please have a family member or friend call your JCC doctor's office, clinic or treatment area and let us know. This is important. We need to make sure that you are seen as early as possible in the day so that you can be on your way home before 5:00 pm.

If you arrive by ambulance you will be cared for by nurses in the ambulance care area while you wait for your appointments.

Health care team

While at the JCC many health care staff will be involved with your care, however your oncologist (cancer doctor) and primary nurse will coordinate your care during clinic appointments. Students from McMaster University and Mohawk College may also be involved in your care. There is space on page 44 to write down the names of your health care team.

You are the most important member of the team. We encourage you and your family to take part in your care.

Appointments

Your appointments could be in:

- a clinic
- the Chemotherapy Suite
- Radiation Therapy
- the lab
- Supportive Care
- the Henderson General Hospital for various tests

You may have to go to a few areas on the same day.

What to bring to your first appointment

- Health card (you will need this card at every appointment)
- Family doctor's name and phone number
- Your address and phone number
- The name and phone number of at least 2 people to contact if we cannot reach you about an appointment change. To protect your privacy, we will not leave a message on an answering machine unless it identifies you by your name.
- Reading glasses, if needed
- Portable oxygen if you need it to travel to and from the JCC
- Notebook, pen, this book – you may want to write down information that has been discussed
- Medications (see below)

Medications

Bring all of your current medications with you in their original containers to each appointment with your oncologist and primary nurse. These include:

- prescription medications
- vitamins, herbal products or treatments
- over-the-counter or non-prescription medications
- any pain medication you need during the day

Complementary or alternative therapy

If you are taking complementary or alternative therapy such as herb treatments and other products, tell your health care team. This is important to make sure that these therapies do not interfere with your cancer treatment. For more information about complementary therapy call Cancer Information Service at 1-888-939-3333 and speak with an information specialist.

Your first clinic appointment

Your first appointment could be quite long, so allow yourself a few hours. We do our best to avoid delays but some appointments take longer than others.

Food

A refreshment service is provided by the Canadian Cancer Society. Feel free to bring snacks. There is the Hummingbird Café on Level 0 of the JCC. A café and Tim Hortons are in the Henderson General Hospital to buy food and drinks.

Clinics

There are 6 clinics at the JCC with many examination rooms. They are identified by letters A to F. Clinics A, B, C and D are located on the main floor or Level 1. Clinics E and F are upstairs on Level 2.

Information desk

When you arrive at the JCC please go to the Information desk located in the Main Lobby on Level 1. The receptionist will welcome you and confirm your appointment and contact information. From there, you will go to the clinic. Canadian Cancer Society volunteers (dressed in yellow jackets) will help you find your way.

At the clinic, the clinic clerk will ask you for your health card and confirm your health information. After checking in, please make yourself comfortable in the waiting area.

There are large flat screen TVs in each waiting area, tuned in to the C.A.R.E. channel, where you may enjoy beautiful images and scenery. Our volunteers provide newspapers, knitting, and magazines. Information about our services is also available.

Help us manage your symptoms

You will be asked to complete a tool called the Edmonton Symptom Assessment Scale (ESAS). You will be asked to rate 9 different symptoms using a touch screen computer. A volunteer will be available to show you how to use the computer. By telling us how you are feeling, we will be able to better understand and help with your symptoms.

Meeting your primary team

You will meet with an oncologist and primary nurse. They are your primary team and will be with you throughout your cancer treatment and follow-up. With you, they plan your treatment and co-ordinate any diagnostic tests and services you need.

The oncologist and nurse will ask questions about your present and past health. This is the time to talk about your concerns. During your appointments you may meet with advanced practice nurses and advanced practice radiation therapists.

Planning your treatment

Although your doctor or surgeon has sent your medical information to the JCC, the oncologist may need more information, tests or blood work to plan your treatment. You may also need to see other team members for more discussion and review of treatment options.

There is a lot of information to absorb and think about. You will be given written information. You may need to make decisions to help your primary team plan your care. We recommend that you bring a family member or friend with you to all of your appointments to listen and take notes.

You may need to sign consent forms. If you find the forms too confusing, please let us know.

More appointments may be needed to figure out the best treatment options and care for you. These appointments will be made before you leave.

If you do not need treatment, you may be asked to come for a follow-up appointment.

Future appointments

Always bring your health card to each appointment. Your oncologist and primary nurse will ask questions about your health, how you are doing and may do a physical examination. You may have other appointments within the JCC.

Staff and volunteers are here to help you during any appointment. Please ask us questions and let us know your concerns.

Let the clinic clerk know of changes to your address, phone number or family doctor.

Appointment changes

We try hard to make sure that your appointments go ahead as planned but changes can happen. We will give you as much notice as possible if your clinic appointment needs to be changed.

If you need to change an appointment call the clinic of your scheduled appointment. If possible, please call at least 24 hours ahead of time. We have long wait lists, so if you cannot make it, then someone else may be able to.

Tests and lab results

Test and lab results are usually given during clinic appointments, unless you were told to call. We understand that waiting for these results is difficult, but we feel it is important to discuss them in person with your doctor.

Medications

At each appointment your medications will be reviewed. Please bring them in their original containers. Prescriptions will be renewed as needed. Any prescription ordered by your family doctor or other specialist needs to be reordered by them. If you need a prescription refilled before your next JCC appointment, call your community pharmacy to do this. Allow at least 2 business days for a prescription to be refilled.

If your current medications change or if your health condition has changed, let your nurse and doctor know during your next appointment.

If you have concerns about paying for medications, please discuss with your primary team.

Cancer treatments

There are 3 major ways to treat cancer:

Chemotherapy – are drugs which kill or damage cancer cells

Radiation therapy – uses high-energy radiation rays or particles to damage or destroy cancer cells.

Surgery – removes the tumour or area with cancer

You may need one of these treatments or a combination of them. You and your health care team will work together to develop a treatment plan that is best for you.

Cancer care is not just about treatment, there are other services that are available to help you. They are described throughout this handbook.

Chemotherapy

Chemotherapy nurses

Chemotherapy nurses are registered nurses who have specialized training to give chemotherapy. These nurses will teach you how to care for yourself while on treatment and manage any chemotherapy-related side effects.

Chemotherapy class

Your oncologist and primary nurse will give you information about your chemotherapy. You will be scheduled into a chemotherapy class before you begin treatment.

The class is one hour long and is offered 3 times during the week. You will learn what to expect during treatment, how to manage side effects and how to care for yourself while on chemotherapy. Keep in mind that “chemo” has changed over the years. We can now do many things to help prevent side effects that you may know about such as nausea or feeling sick to your stomach.

We encourage you to ask questions and talk about your concerns during this class. Please bring a family member or friend with you.

During the class you will be given a book called “Learning about chemotherapy for patients and families” to take home.

Chemotherapy Suite

The Chemotherapy Suite is the place where you will receive your chemotherapy treatment. It is on Level 2 of the JCC.

Treatment is different for everyone. It can last just a few minutes or take several hours. Wear comfortable clothes and bring a book or activity. The Chemotherapy Suite may be very busy and crowded. For safety reasons, please have only 1 family member or friend, who is over the age of 16, with you in the Chemotherapy Suite.

Be sure to:

- bring your health card
- bring your prescribed medications for the day, especially pain or diabetes medications
- bring a current list of your medications
- bring food or money to buy lunch
- take your regular medications unless you have been told otherwise

Lab

Our lab serves thousands of patients with cancer. It is located on Level 1, just inside the front doors of the JCC. In order to decrease the wait times for you and for all patients, please arrive on time for your lab appointment. We will do our best to work with you to select a time that meets your needs and that keeps us running on time. If you need chemotherapy, lab work is done before treatment begins. If you have a special intravenous device such as a PICC or PORT, your lab work will be done by a nurse in the Chemotherapy Suite.

Please note that this lab is only to be used for tests ordered by your JCC doctor. Tests ordered by your family doctor must be done at a community lab.

Arriving at the Chemotherapy Suite

Please register at the reception desk after you have gone to the lab. If you have a special intravenous device such as a PICC or PORT, your lab work will be done by a nurse in the Chemotherapy Suite.

The clerk will place an identification wristband on your arm. The clerk will also give you a number. Your number is called by the nurse when it is your turn for treatment. The number is called instead of your name for privacy reasons.

Chemotherapy is prepared by our pharmacy technicians. Before you begin your treatment, you will meet with a pharmacist to review your blood work and talk about any side effects of chemotherapy that you might have.

The chemotherapy nurse will check your identification wristband, the doctor's order and the type and amount of chemotherapy you are to receive before beginning treatment.

After your treatment, please remember to stop by the reception desk for your next appointment. You may also need to get your prescription medications to take home from the Pharmacy.

JCC Pharmacy

Our pharmacy staff have expert knowledge about cancer drugs. If you have questions about your drugs, please ask them.

The JCC Pharmacy is located on the 2nd level of the JCC. It is just to your left as you exit the main elevators. The hours are:

Monday to Friday, 9:00 am to 5:00 pm

Closed on weekends and statutory holidays

Phone: 905-575-6320

We recommend that all patients get their first drug prescriptions filled at the JCC Pharmacy. We carry the drugs your oncologist will prescribe. Some of these drugs may not be stocked at your local pharmacy. If you get these drugs first at the JCC, then we can transfer the prescription to your regular pharmacy. This will allow time for your pharmacy to get a supply of your medications added to their regular stock and prevent treatment delays.

The pharmacy also sells supportive medications that you may need during your treatment; usually at prices lower than what you would find in your local stores.

Radiation therapy

Radiation therapy uses high-energy radiation rays or particles to damage or destroy cancer cells.

Normal cells are able to recover from this damage better than most cancer cells. Radiation given from outside your body is called external radiation. Radiation given to inside your body is called internal radiation or brachytherapy.

If you need brachytherapy, information will be provided on how to prepare for this treatment. The Brachytherapy Suite is on Level 0.

The type of radiation you may need and how to care for yourself while receiving radiation will be discussed with you by your treatment team. Written information will also be provided.

Radiation therapists

Radiation therapists work with your oncologist and physicist to plan, coordinate and deliver your radiation therapy treatments. These therapists are trained to support you during your radiation treatments and can teach you how to care for yourself and manage side effects.

Arriving for radiation therapy

Radiation treatment machines and services related to the Radiation Therapy Program are located one floor below the main entrance on Level 0.

The Radiation Therapy Program includes:

- Radiation treatment planning
- Radiation treatments
- Patient Review Clinic
- Patient Assessment Office

When you arrive at the JCC for any of these services you must check in at the Level 0 reception desk with your health card. The receptionist can then direct you to your appointment.

Radiation treatment planning

Before your treatments can begin, your radiation therapy team will plan every part of your treatment. You will get a phone call with the date and time of your appointment for treatment planning.

It may be necessary for a mask or body mould to be made for you. Depending on where the radiation will be directed, the first step may be making a facemask (shell) or body mould (cradle). These will be used to hold your head or body in the proper position during your treatments. If you do not need a mask or mould, your first step will be a simulation appointment. A simulation appointment is like a practice session or dry run before the actual radiation treatment begins.

When you arrive for your appointment, a radiation therapist will explain the planning procedure and will take you to a special type of machine called a simulator. The radiation therapist along with other team members takes measurements needed for the detailed planning of treatment.

The treatment area on your skin may be tattooed and marked with an ink marker. This is the area that will be used when setting up for daily treatments.

This appointment usually takes between 30 minutes to 1 hour to complete. If a treatment plan is complex, more than one visit to the simulator may be needed before starting treatment.

Radiation treatments

Once treatments begin, your appointments may be every day, Monday through Friday. A treatment may be over several days or weeks and may start on any day of the week. There are no scheduled treatments on weekends or statutory holidays.

A treatment appointment may be 15 to 30 minutes long. Most of this time is spent getting ready for the treatment. The actual amount of time that the radiation beam is on may be only 1 or 2 minutes.

While on treatment, the radiation therapists leave the room but will watch you on a TV screen and listen by intercom. The radiation can be stopped at any time to allow staff to enter the room and will switch off once the treatment has been given.

Patient Review Clinic

While you are on radiation therapy, you will meet with your oncologist and primary nurse on a regular basis to check how you are doing.

Patient Assessment Office

Nurses who specialize in radiation oncology are available to meet you while on radiation treatment if you have questions or concerns. You can come on your own on a drop in basis (no appointment is needed) or by referral from your radiation therapists.

Pediatric radiation therapy

The JCC provides a warm, safe and playful area for children who receive radiation treatments. A separate waiting room called the POD has DVDs, music and toys for children and their families.

The pediatric team is made up of radiation oncologists, a pediatric nurse, a pediatric radiation therapist and staff from McMaster's Children Hospital.

Surgery

Surgery does not take place at the JCC even though surgeons are on staff. If surgery is needed it will be arranged in one of the hospitals in Hamilton or closer to your home.

Clinical trials

The JCC is a leader in cancer research. In our research we look at ways to prevent, diagnosis and treat cancer. We also look at ways to improve the quality of life for those individuals with cancer. For these reasons clinical trials are an important part of the cancer care we provide.

During your appointment with your primary team, we will talk about the types of treatments that are used to treat your type of cancer. One of your options may be a clinical trial.

What is a clinical trial?

A clinical trial is a type of research study that helps to find new ways to diagnose, treat, manage or prevent a disease. Cancer clinical trials test new drugs, new approaches to radiation or surgery, or any combination of these.

The information we learn from clinical trials:

- contributes to our knowledge of cancer
- results in progress in the treatment of cancer
- provides direction for future research

Clinical trials need patient volunteers. You do not have to participate in a clinical trial. Participation is voluntary. If you are interested in being part of a clinical trial, speak to your doctor. If you wish to find out more you can meet with a clinical trials nurse or clinical research associate. If you choose to participate in a clinical trial, you can decide to stop at any time.

For information on current clinical trials at the JCC, go to the JCC website www.jcc.hhsc.ca or www.ontariocancertrials.ca to find a list of all clinical trials that are open to enrollment in Ontario.

Please understand that there are too many trials for us to offer all of them; however, we may have very similar trials to one you may be interested in.

To find out more about clinical trials in general visit:

- Canadian Cancer Society www.cancer.ca
- Cancer Information Service 1-888-939-3333

Supportive Care

Supportive Care services are available for patients and families going through treatment and after treatment for cancer. Supportive Care is located on Level 2 of the JCC.

Like many people facing cancer, you and your family may have questions or concerns about:

- your job and finances
- talking to your family and friends about your cancer
- helping young children understand what is happening
- accessing available community and government resources

- managing day-to-day activities
- healthy eating
- coping with weight loss or changes in your appetite
- the pain or symptoms associated with your cancer and its treatment

- feeling worried or sad
- your spiritual or religious needs
- grief and death and dying
- understanding the health care system and how to access necessary resources

We will work with you, your family and your primary team to help identify and respond to your supportive care needs. Based on your needs, you may meet one or more members of the Supportive Care team.

Supportive Care team members

Aboriginal patient navigator

The aboriginal patient navigator helps aboriginal patients and their families by:

- providing support at clinic visits
- helping patient and families communicate with doctors and nurses
- arranging language and cultural translation
- helping patients and families find services
- helping connect with traditional Aboriginal healers

Chaplain

The chaplain is available to patients and families whether or not they follow a particular religious belief or tradition. The chaplain is available to:

- listen and offer spiritual guidance and emotional support
- accompany those in crisis or grief
- share prayers

The Chapel/Spiritual Centre, a place for rest, quiet reflection, prayer and/or mediation. It is located on the Main Floor (Level 1) of the Henderson General Hospital just off the west elevators in the G Wing.

Genetic Counselling Services

The genetic counselor provides services to patients who are concerned about their personal and/or family history of cancer. The genetic counselor reviews a patient's family history to see if their cancer might have a hereditary cause. This information can be helpful when making medical decisions and managing cancer risk for patients and families.

Mental Health Services

For many patients with cancer, the experience can be very difficult. Patients may experience:

- a low mood
- problems sleeping
- tearfulness
- anxious feelings
- panic attacks
- difficulty making decisions
- feeling hopeless

A clinical nurse specialist and psychiatrist provide services to patients experiencing these kinds of difficulties.

Registered dietitians

Sometimes cancer and/or treatment cause problems with nutrition. Registered dietitians are experts in the nutritional care of patients with cancer. Dietitians can help with:

- problems with appetite and weight loss
- nausea and vomiting
- constipation and diarrhea
- difficulty in swallowing
- special dietary needs
- health eating and weight management

Dietitians help patients in eating as well as possible.

Social workers

Social workers can help patients and their family members with the emotional, social and practical concerns they may experience in dealing with cancer. Social workers are professionally trained counselors who can provide:

- individual, couple or family counselling
- help with money matters
- help in communicating with the health care team
- information on community resources
- help talking with children
- help with future planning

Pain and symptom management team

The pain and symptom management team can help you learn ways to manage pain and symptoms caused by cancer and or treatment such as:

- pain
- constipation
- nausea and vomiting
- fatigue
- depression and anxiety
- shortness of breath
- difficulty in coping

How to contact Supportive Care

A referral to Supportive Care can be made through your oncologist, primary nurse or radiation therapist. You can also call us:

905-387-9495, ext. 64315

Monday through Friday

9:00 am to 5:00 pm

Resources and Services

The Patient and Family Resource Centre

The Patient and Family Resource Centre is located in the main lobby of the JCC just to the left as you enter the main doors. The JCC in partnership with the Canadian Cancer Society and Wellwood provide information and supportive programs for people with cancer. Staff and volunteers are happy to work with you to find any information you need.

Resources include nearly 1,000 books, videos, audiocassettes, CDs and DVDs. To support you along your cancer journey information is provided about:

- diagnosis and treatment
- nutrition, stress management, coping, relaxation techniques
- physical activity, survivorship and more

Three computers with internet access are also available for public use. We are more than happy to help you to find more health information on the web.

Feel free to contact us:

Phone: 905-387-9495, ext. 65109

Email: jccpfrcentre@jcc.on.ca

Website: www.jcc.hhsc.ca

Wellwood

Wellwood is a community service that provides information and support programs to people with cancer and their families, caregivers and healthcare providers.

Some of the services include:

- peer support programs/services
- creative expression programs
- information navigation services
- moving and coping programs

Wellwood is on the first floor (near the west elevators) of the Henderson General Hospital. A new site is currently being built on the mountain near Chedoke Hospital.

A staff member or volunteer from Wellwood is also available daily in the JCC Patient and Family Resource Centre.

Telephone: 905-389-5884

Email: wellwood@hhsc.ca

Please feel free to drop in or call us for more information.

Community Care Access Centre (CCAC)

If you need nursing or health care services at home, please discuss with your primary team. A CCAC co-ordinator is available to talk with you about your needs.

Telephone: 905-523-8600 or toll free 1-800-810-0000

Phone the JCC: 905-387-9495 ext. 64137 or 64306

Website: www.hnhb.ccac-ont.ca

The Canadian Cancer Society

The Canadian Cancer Society (CCS) works very closely with the JCC. You will see CCS volunteers in their yellow jackets helping patients throughout the JCC. The CCS does research, offers support programs and provides information related to cancer. All these services and more are possible because of generous donors and volunteers. For more information visit their website: www.cancer.ca

The Cancer Information Service

Cancer can be difficult to understand and coping can be stressful. It helps to have someone you can talk to and trust for reliable information.

The Cancer Information Service is for all people with cancer, their families, the public and healthcare workers. Service is across Canada and in French and English. Interpreters are available for other languages.

The information you receive is confidential and tailored to your needs. A direct phone line is available in the JCC Patient and Family Resource Centre or call toll-free 1-888-939-3333, TTY: 1-866-786-3934 or contact cis@ontario.cancer.ca

Lakeview Lodge

Lakeview Lodge is a place for patients to stay who are receiving care at the JCC. The lodge is located behind and attached to the JCC. There are hotel-type rooms for up to 20 guests. All rooms are semi-private – 2 people share a room – and include a full washroom. There is no charge for patients who are Ontario residents. When space is available, and for a cost, a family member or friend may stay. All guests must be able to care for themselves.

Please register before your scheduled arrival day by calling 905-575-6302.

Smokers' Helpline

The Canadian Cancer Society offers a program to stop smoking. For more information call Smokers' Helpline 1-877-513-5333 or visit the website www.smokershelpline.ca

Cancer screening

Cancer Care Ontario offers screening programs for 3 types of cancer: breast, cervical and colorectal. To learn more about these programs talk to your oncologist and/or visit the website: www.cancercare.on.ca

Safety

Infection

If you have been in the hospital and were in isolation for any reason, please let us know before any appointment.

Many of our patients have weakened immune systems. This means that their body's defense systems are weak and that they can get infections easily.

Any family members, friends or visitors who feel unwell should not come to the JCC. This includes having:

- shingles, chicken pox – viral infections
- a cold, flu, sore throat, runny nose
- upset stomach, vomiting, diarrhea
- open wounds, sores or rashes

To help prevent infections – Clean your hands

When you first arrive at the JCC, please clean your hands. There are supplies to clean your hands at the entrance and throughout the JCC.

No smoking

Hamilton Health Sciences and the JCC are smoke free.

Fragrance restricted

We are a fragrance restricted hospital and cancer centre. Please do not wear or bring perfume, cologne, aftershave, scented hair spray or other scented products.

Latex-free environment

Please do not bring latex balloons into the JCC. If you have a latex allergy, please let your nurse know.

Cellphones

No cellphones or wireless communication devices can be used in areas such as the clinics, chemotherapy suites, labs, and radiation therapy. They can be used in the lobby and Hummingbird Café.

Privacy

At Hamilton Health Sciences we promise to protect and keep your health information private. We have rules on how health care providers can collect, use and share your health information. If you would like more information about your privacy rights please ask your primary team and or ask for our handout on privacy. You can contact the Privacy Office at 905-521-2100, ext. 75122 or email privacy@hhsc.ca

Patient Relations/Risk Management

If you have concerns about your care at the JCC or would like to share a compliment, please call Patient Relations/Risk Management at 905-521-2100, ext. 75240 or email patientrelations@hhsc.ca

Your Health Care – Be Involved

Hamilton Health Sciences takes part in the Ontario Hospital Association's program, "Your Health Care – Be Involved". The program provides 5 tips to encourage patients to be more involved in their health care:

1. Be involved in your health care. Speak up if you have questions or concerns about your care.
2. Tell a member of your health care team about your past illnesses and your current health condition.
3. Bring all of your medicines with you when you go to the hospital or to a medical appointment.
4. Tell a member of your health care team if you have ever had an allergic or bad reaction to any medicine or food.
5. Make sure you know what to do when you go home from hospital or from your medical appointment.

For more information, ask a member of the health care team for a copy of "Your Health Care – Be Involved". You can also print a copy at the Ontario Hospital Association's website www.oha.ca

Juravinski Cancer Centre Foundation

The Foundation contributes to patient care, research and education at the JCC. Our donations are often used to buy equipment and support research projects. Most recently, we supported the expansion of the JCC.

The Foundation is really about people. Some give their time, while others donate money. Both are important in our goal of bringing hope to patients with cancer.

The staff of the Juravinski Cancer Centre Foundation is happy to meet and talk with patients and families who are interested in giving back.

If you would like to learn more about the Foundation or make a donation:

Foundation office: on the first floor of the JCC, across from
the information desk

Website: www.jccfoundation.on.ca

Phone: 905-575-6380

Tell us what you think!

After reading the new **Patient and Family Handbook**, please answer the following statements. Your responses will help us improve the information.

Please check:

- I am a patient of the JCC I am a family member or friend of a patient of the JCC

On a scale from 1 to 5, with 1= strongly disagree and 5 = strongly agree, circle the number that best describes how you agree with the statement.

Statement	Strongly disagree				Strongly agree
The information helped me prepare for my visits at the JCC.	1	2	3	4	5
I learned about what the JCC has to offer patients with cancer.	1	2	3	4	5
The information answered my questions.	1	2	3	4	5
The words and sentences were easy to read.	1	2	3	4	5
The information is understandable.	1	2	3	4	5

What else would be helpful to know before coming to the JCC?

Comments:

Please return this survey to the JCC Patient and Family Resource Centre just beside the front door. Thank-you!

Your type of cancer _____

Oncologist _____

Primary Nurse _____

When to call the JCC at 905-387-9495

Appointment change

If you need to change your appointment, call the JCC and ask for the clinic of your scheduled appointment.

Urgent problems

If you have an urgent problem as listed below and need to speak with your doctor, call the JCC at ext. _____. Describe your concern to the secretary. Please have your chart number ready too. Urgent problems are any changes in your condition, such as:

- fever of 38.0°C or higher
- bleeding
- difficulty breathing
- chills
- nausea, vomiting
- pain

If you become very short of breath or develop severe chest pain, call 911 or go directly to the nearest Emergency Department.

Urgent problems after 5:00 pm or on the weekends

There is only one doctor available on-call after hours, so please only call for urgent problems. Call the JCC and say you are a patient of Dr. _____. The answering service will take your message, and a doctor will return your call. Have your local pharmacy phone number and prescription information available.

**Front Mural: "Riding the Dragon"
by Conrad Furey**

Riding the Dragon is a 30 foot mural created in 2006 by renowned Hamilton Artist Conrad Furey. The images in the mural reflect Conrad's personal experience with cancer, his valued relationships with the staff who cared for him, and pays special tribute to the Knot-a-Breast dragon boat team. The mural hangs in the atrium of the cancer centre and provides, comfort and reflection to patients, staff and visitors.
