

## Cancer related "brain fog" - fact sheet

Cancer related "brain fog" is not dementia or Alzheimer's. The reasons for developing it are poorly understood. Here are some suggestions that may help you deal with the "fog":

Remembering	Sharpen your mind
<ul> <li>Set timers</li> <li>Use calendars</li> <li>Track meals, sleep, activities</li> <li>Write things down (journal)</li> <li>Post notes for yourself</li> <li>Involve family and friends</li> <li>Use electronic reminders</li> <li>Use GPS, maps</li> </ul>	<ul> <li>Repetition silently and out loud</li> <li>Concentrate on what you need to know; screen other info out</li> <li>Group things by category</li> <li>Summarize your day</li> <li>Focus your attention</li> <li>Avoid multi-tasking</li> </ul>
Organize	Other
<ul> <li>Make routines</li> <li>Keep your calendar open and visible</li> <li>Organize your space</li> <li>Use a pill organizer</li> </ul>	<ul> <li>Exercise</li> <li>Eat healthy</li> <li>Get enough sleep</li> <li>Socialize</li> <li>Learn a new skill</li> <li>Take a break</li> <li>Learn to laugh</li> </ul>
