

# Medication Information

## **Clonazepam** **(Cloe – na – ze – pam)**

---

### **Other names for this medication**

Rivotril®

There are many other names for this medication.

### **How this medication is used**

This medication is used to decrease anxiety and feelings of panic. It may also be used to treat and prevent seizures, and promote sleep.

If you are pregnant or thinking about getting pregnant, talk to your doctor about the risks and benefits of taking this medication.

### **How to take this medication**

Take this medication exactly as directed by your doctor. You should not take more of this medication without talking to your doctor first.

If you miss a dose of this medication, take it as soon as possible. However, if it is almost time for the next dose, skip the missed dose and go back to your regular time. Do not take 2 doses at one time.

If you take this medication regularly, do not stop taking it without checking with your doctor first.

This medication makes some people drowsy. Until you know how this medication makes you feel, do not drive or operate machinery.

Always check with your doctor or health care provider before taking any over-the-counter medications such as antihistamines, cold remedies or natural and herbal products.
