

Accessibility Plan

Hamilton Health Sciences

2020-2025

Accessibility Plan

Executive Summary

HHS supports the right of persons of all ages with disabilities to equal opportunity to its health services, programs and employment opportunities. Removing barriers to daily living is not a voluntary measure, but a fundamental human right and constitutional right of equality for persons with disabilities. This is provided under the Canadian Charter of Rights and Freedom, the Accessibility for Ontarians Disability Act (AODA) and the Ontario Human Rights Code. The Canada Health Act guarantees everyone, including those with disabilities, access to health care services. HHS is committed to build on what it has already achieved and to move towards an organization in which no new barriers are created and existing ones are removed.

1.0 Purpose

To remove the barriers for people with disabilities through increased awareness, understanding and identification of their needs for accessibility planning, implementation and evaluation.

The purpose of this plan is to increase access to services and minimize barriers to participation for people with disabilities within Hamilton Health Sciences (HHS). The goal of the multiyear plan is linked to the 2005 *Accessibility for Ontarians with Disabilities Act* (AODA). The AODA is to improve opportunities for people with disabilities and to provide for their involvement in the identification, removal and prevention of barriers to their full participation in the life of the province.

Effective July 27, 2007, Accessibility Standards for Customer Service under the Accessibility for Ontarians with Disabilities Act (2005) were received. These standards direct public sector organizations to develop a variety of tools and services to ensure citizens with disabilities engage in full participation in activities within the province of Ontario.

These standards were implemented in the public sector January 1, 2010.

They represent substantial changes to Policy and Procedure in Public Sector organizations. This plan is reflective of ongoing work to address access issues within all sites of Hamilton Health Sciences (HHS).

This plan will outline:

1. The measures that HHS has taken in the past two years (2017-2019).

2. The measures that HHS will take over the next 5 years, 2020-2025, to identify, remove and prevent barriers to people with disabilities who live, work in or use the facilities and services of HHS.

This plan addresses the needs of patients and their family members, staff, health care practitioners, volunteers and members of the community (adapted from AODA website).

Hamilton Health Sciences is committed to the needs of Ontarians with disabilities accessing services at HHS; the needs of these individuals are fully considered within the context of the AODA legislation. HHS recognizes the need to ensure that future planning for services and facilities accessed by individuals with disabilities should be fully informed by individuals living with disabilities.

Aim and Objectives

This report will:

- Describe the process by which HHS will identify, remove and prevent barriers for people with disabilities.
- Describe the measures HHS will take in the coming year to identify, remove and prevent barriers for people with disabilities.
- Outline the review and monitoring process of the multi-year Accessibility Plan.
- Describe how HHS will make this Accessibility Plan available to the public.

Background

The Accessibility of Ontarians with Disabilities Act (2005) is aimed at creating a barrier free Ontario by 2025. This corporate plan is meant to continue to build on past progress and accomplishments and to lay the foundation for the development of new accessibility standards under the AODA (2005).

The purpose of the more expansive AODA legislation is to develop, implement and enforce standards of accessibility for all Ontarians. The standards under this Act include the areas of:

- Customer Service (i.e. services to the public; could include business practices and employee training)
- Built Environment (i.e. access to, from and within buildings; could include counter heights, aisle/door widths, parking, signs, safety features such as flashing alarms)
- Employment (i.e. hiring and retention of employees)

- Communications and information (i.e. materials and tools such as publications, software applications and web sites)¹

The AODA adopts the broad definition for disability that is set out in the *Ontario Human Rights Code*. "Disability" is:

- a. any degree of physical disability, infirmity, malformation or disfigurement that is caused by bodily injury, birth defect or illness and, without limiting the generality of the foregoing, includes diabetes mellitus, epilepsy, a brain injury, any degree of paralysis, amputation, lack of physical co-ordination, blindness or visual impediment, deafness or hearing impediment, muteness or speech impediment, or physical reliance on a guide dog or other animal or on a wheelchair or other remedial appliance or device,
- b. a condition of mental impairment or a developmental disability,
- c. a learning disability, or a dysfunction in one or more of the processes involved in understanding or using symbols or spoken language,
- d. a mental disorder, or
- e. an injury or disability for which benefits were claimed or received under the insurance plan established under the *Workplace Safety and Insurance Act, 1997*.²

Barriers

What is a barrier?

A "barrier" is anything that prevents a person with a disability from fully participating in all aspects of society because of his or her disability, including a physical barrier, an architectural barrier, an informational or communications barrier, an attitudinal barrier, a technological barrier, a policy or a practice.³

Hamilton Health Sciences is a community of 15,000 staff, physicians, researchers and volunteers that proudly serves southwestern Ontario residents. We also provide specialized, advanced care to people from across the province.

We're the only hospital in Ontario that cares for all ages, from pre-birth to end-of-life. We offer world-leading expertise in many areas, including cardiac and stroke care, cancer care, palliative care and pediatrics.

We are a world-renowned hospital for healthcare research. We focus daily on improving the quality of care for our patients through innovation and evidence-based practices.

As the largest employer in the Greater Hamilton region, we play a vital role in training the next generation of health professionals in collaboration with our academic partners, including McMaster University and Mohawk College.

Our Mission, Vision and Values

Mission

To provide excellent health care for the people and communities we serve and to advance health care through education and research.

Vision

Best care for all

Values

- **Respect:** We will treat every person with dignity and courtesy.
- **Caring:** We will act with concern for the well-being of every person.
- **Innovation:** We will be creative and open to new ideas and opportunities.
- **Accountability:** We will create value and accept responsibility for our activities.

Barrier Identification Methodology

Our senior leadership, site leads and managers were requested to provide feedback regarding the identification of barriers and strategies to address them. This included input from Emergency Preparedness, Facilities Management, Communications & Public Affairs, Health Information and Technology Services (HITS), Site Leads for the various campuses at HHS, Occupational Therapy, Physio Therapy and Speech Language Pathology. Feedback was also reviewed from patients and families through Patient Experience.

Methodology	Description	Status
Reviewing feedback from patients and visitors	The department of Patient Experience regularly receives feedback from patients and families regarding accessibility issues. Patient Experience then is able to direct the concerns to the most appropriate department, i.e. Facilities Management.	Ongoing throughout the year.
Canvassing hospital Leadership and management.	E-mail requests were sent out to chiefs of departments, site leads, managers and other stakeholders who would be in a position to be aware of accessibility issues.	Barriers identified, and measures taken to mitigate or remove.
Brainstorming exercise with Accessibility working group.	Members identified actual and potential barriers and sought follow up from the most responsible department.	This has contributed to the current Accessibility plan.
Environmental Scan	Conducted by Facilities Management and Capital Development to identify areas in need of repair, refurbishment or renovation to maintain or improve accessibility.	Ongoing throughout the year and as a part of all new capital projects.

Barriers and Opportunities Addressed in 2017-2019

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
Informational and Communications	McMaster University Medical Center	Audit of signage for content and placement for Wayfinding	New signage ordered and when possible signs are installed on walls rather than suspended from ceiling, font size is made as large as possible and additional directories with maps added to the site.
Informational and Communications	Hamilton General Hospital	No clear signage in Main Lobby as to where the nearest accessible washroom is.	New sign posted in Main Lobby to indicate nearest accessible washroom.
Informational and Communications	Hamilton General Hospital	Can be difficult to navigate the hospital with current signage.	Coordinating colors and photos to assist with Wayfinding i.e. a picture of a green tree on a green background, to allow for land marking when providing directions such as, 'when you get to the green tree, turn right'

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
Informational and Communications	Hamilton General Hospital	Main Entrance sign small and not lit at night	A new sign has been installed that lights up at night
Informational and Communications	West Lincoln Memorial Hospital	Lack of available tools for patients with communication barriers (language, visual or auditory deficits, etc.)	Accessibility communication kit developed. Resource kit containing personal whiteboard, pocket talker, magnifying glass, communication picture cards, etc. available for staff to sign out and use with patients as needed.
Informational and Communications and Attitudinal	All Sites	Difficulty connecting and partnering with our seniors population and their specific needs	The creation of the Personhood Profile, three questions that allow care team members to better understand and relate to the person behind the illness.
Physical and Architectural	Hamilton General Hospital	New renovations incorporating accessible washrooms, doors.	Renovations to the Emergency Department and the Cardiac Arrhythmia Clinic included accessible washrooms and automatic door access.
Physical and Architectural	Hamilton General Hospital	The old Information Desk was difficult to locate and access- high counters and small window.	The Information Desk was moved to a more accessible area in the Main Lobby, has different heights at the transaction counter and better lighting and visibility to people arriving through the main entrance.
Physical and Architectural	Hamilton General Hospital	New Admitting area did not have accessible counters.	Accessible counters added to Admitting area.
Physical and Architectural	Hamilton General Hospital	Coffee Shop did not have dedicated accessible seating areas, and counter height was high.	During planned renovations, barrier free counter and accessible seating was included.
Physical and Architectural	Hamilton General Hospital	Parking ramp had issues with poor lighting, lack of accessible doors to parking area, and the Parking Office was not accessible.	Lighting upgrades included converting to LED to improve visibility, painting of the steps and curbs in yellow to improve contrast for visually impaired people, installation of automatic doors to the parking ramp and a

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
			barrier free ramp to the Parking Office.
Physical and Architectural	Hamilton General Hospital	Sidewalk at the East Wing required repair, and crosswalk for safety. Could benefit from urban Braille.	New sidewalk and crosswalk installed to improve wheelchair accessibility.
Physical and Architectural	Hamilton General Hospital	Staff Library at 286 Victoria St was not wheelchair accessible	The Staff Library was moved to a wheelchair accessible location at 293 Wellington St.
Physical and Architectural	Hamilton General Hospital	Cafeteria design was old and not fully accessible	The recent cafeteria renovations included the addition of barrier free counters and check out areas, accessible seating areas and lounge areas have been incorporated into the design. Access to the food area has been greatly improved with the removal of the former turnstile and widening of entrances.
Physical and Architectural	Juravinski Hospital	Height of curb on the sidewalk in front of the hospital too high for manual wheelchair as reported by a patient.	Facilities Management notified the City of Hamilton and repairs have been completed
Physical and Architectural	Juravinski Hospital	New build taking place to update and expand the facilities at the hospital presented the opportunity to proactively incorporate accessibility planning.	600,000 sq. ft. new area with ODA approved design, including washrooms, handrails, elevator buttons and doors in the A, B, and C wings.
Physical and Architectural	Juravinski Hospital	New parking lot planned along with new build. Also Poplar parking ramp required a new elevator.	New parking lot is flat, near the entrance and has new handicap parking spots. The Poplar parking ramp has a new accessible elevator.
Physical and Architectural	Juravinski Hospital	New washrooms created during	Three new handicap washrooms in 90 Wing, and grab bars added in

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
		renovations, as well as upgrades to existing facilities.	patient washrooms throughout the site.
Physical and Architectural	Juravinski Hospital F5 – Inpatient Unit	Environment needed improvement for ALC patient population.	Height adjustable tables purchased for patient dining room. Doorway frames painted contrasting colour for visually impaired patients.
Physical and Architectural	Juravinski Hospital - Stem Cell	New stem cell and pharmacy clean room project currently under construction presented the opportunity to proactively incorporate accessibility planning.	The new unit has been designed and being built to AODA standards. The 15 inpatient unit will include an accessible bariatric patient bedroom and ensuite 3 piece washroom.
Physical and Architectural	McMaster University Medical Center	New public washrooms in the yellow quadrant on level 2. The old washrooms were very small and tight.	The new ones are barrier free and have wheelchair accessible toilets and sinks.
Physical and Architectural	McMaster University Medical Center	The MUMC – Phase 2B projects (PICU, ENDO, DI and POS) have barrier free washrooms in patient areas, as well as accessible counters at Nurse Stations.	Barrier free/accessible provisions allowed in the plans for the new spaces.
Physical and Architectural	McMaster University Medical Center – Emergency Department	Some counters and washrooms not wheelchair accessible.	Created wheelchair accessible counters at registration/care desks. Increased number of barrier free washrooms. Increased number of wheelchair accessible doors.

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
Physical and Architectural	McMaster University Medical Center – Ophthalmology Clinic	This was a recent renovation, issues addressed in design.	Wheelchair accessible doors installed at main entrance. Wheelchair accessible counter installed at registration desk. In consultation with CNIB, provided the following features to improve way finding for those with vision impairments: <ul style="list-style-type: none"> - Textured floor pattern installed at all corridor intersections in a contrasting colour - Braille included on all signage Material and colour selections were reviewed to promote awareness in elevation i.e. counter colour in contrast to floor colour
Physical and Architectural	McMaster University Medical Center – Retail Pharmacy	No accessible retail counters.	New design for both areas includes wheel chair accessible prescription drop off and pick up counters
Physical and Architectural	McMaster University Medical Centre	3Z inpatient ward built in the 70’s was not built to current AODA standards	The recently renovated 3Z inpatient unit includes features not available on the former unit, including accessible showers, tub room and washrooms.
Physical and Architectural	Main West Urgent Care Centre	Senior friendly elements incorporated into the design of the new Urgent Care Centre.	Additional hand rails installed, furniture and colours chosen to optimize contrasts for patients with low vision.
Physical and Architectural	St. Peter’s Hospital	Repairs required to Main Entrance and wheelchair ramp to	Repairs competed to Main Entrance, Lorne St. entrance and wheelchair ramp at the front of

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
		hospital to ensure safety for those with limited mobility.	the hospital to allow for safer wheelchair accessibility.
Physical and Architectural	Wellwood Centre and Spiritual Centre	New renovations, issues addressed during design.	Wheelchair friendly main entrance, with electronic door opener.
Physical and Architectural	West Lincoln Memorial Hospital	Automated main entrance doors – mechanical deficiencies often interfere with patient/visitor entrance/egress. Volunteer information booth too cold to staff depending on weather.	Dual set of new motion/sensor activated main doors improves accessibility to main lobby. Also provides environmental protection to volunteer information booth to permit staffing even during inclement weather (which assists with information/wayfinding).
Physical and Architectural	West Lincoln Memorial Hospital	Front & Central Elevators - Old elevators did not meet current accessibility requirements	All site elevators have been modernized to meet current accessibility Standards
Policy and Practice	Inpatient Areas All sites	Delirium is a common problem among hospitalized older adults causing mental confusion and often lead to longer lengths of stay, poorer functional outcomes, and increased risk of nursing home placement.	Implementation of the Confusion Assessment Method tool (CAM) and the Hospital Elder Life Program (HELP) to better assess for and prevent delirium and the physical and cognitive decline that occurs in high risk older patients. HHS has been designated as the first international HELP Centre of Excellence.
Policy and Practice	All sites	Patients with dementia and /or delirium can be challenging for staff to	Gentle Persuasive Approaches is a voluntary training session for staff of all disciplines to better

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
		care for safely. They often wander, can be challenging to redirect and often restraints are used or code whites are called when working with these patients.	understand dementia and delirium, and learn more effective, gentle strategies to care for this population and reduce restraint use and code whites.
Informational and Communications	Website	New accessible website has been developed to the highest required standards (WCAG 2.0 at level AA)	Next steps are to address and redevelop or enhance (where necessary) HHS affiliated websites such as research institutes
Informational and Communications	Website	Not all documents posted online may be fully accessible but we can provide it in an alternative, accessible format as requested	Training for content writers on how to create accessible Word documents and PDFs to be available online (or in person upon request)
Informational and Communications	Website		Website feedback mechanism for users to request information in an alternate format as well as contact information posted
Informational and Communications	Website		Webpage dedicated to Accessibility with information on accommodations available in hospital
Informational and Communications	Website		Accessible parking information is available on the website's parking pages for each location
Informational and Communications	Website		Floor plans created to show accessible entrances

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
Informational and Communications	All Sites	All gender washrooms	A total of 74 washrooms were identified across all HHS sites and labeled as All Gender Washrooms
Informational and Communications	All Sites	Braille and Raised Text	Room and amenity (washroom, stairs, elevators, etc.) have mandatory inclusion of raised and braille text for permanent messaging of the sign such as room number/location.
Physical and Architectural	Hamilton General Hospital	McMaster Clinic & East Wing Patient Elevators - Old elevators did not meet current accessibility requirements	All site elevators have been modernized to meet current accessibility Standards
Physical and Architectural	St. Peter's Hospital	Main Elevators (4 total) - Old elevators did not meet current accessibility requirements	All site elevators have been modernized to meet current accessibility Standards
Physical and Architectural	St. Peter's Hospital	Courtyard – pathway for patients	Wheelchair friendly walkway for patient, family, visitors and staff. The paved walking path/loop designed for the wellness and recovery of our patients. Also providing interaction, rehabilitative walking and movement, and meditative reflection for patients with physical barriers.
Physical and Architectural	Juravinski Hospital	Concession Street Parking – Levels 5 & 6 Elevator Lobby – installation of	Wheelchair friendly main entrance, with electronic door opener.

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
		Automatic Door Operators	

Barriers and Opportunities Addressed in 2014-2019

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
Informational and Communications	Regional Rehabilitation Centre, and Inpatient Stroke Unit	Patients on these units often have aphasia that affects their understanding of the spoken word and written language, making it difficult to understand their care team, as well as difficult to navigate around the unit.	Picture symbols to be added in key locations around the unit to provide additional information to assist patients in their communication and navigating the environment.
Informational and Communications	All Sites	Seniors often have difficulty with hearing, and or vision.	Visual Magnifying sheets and hearing amplifiers sourced and units and departments encouraged to purchase.
Physical and Architectural	All sites	No visual alarms for emergency codes.	<p>The HGH site was upgraded in 2014 to provide visual alarms.</p> <p>West Lincoln Memorial Hospital fire alarms will be upgraded to visual alarms as part of a current infrastructure project at the site.</p> <p>As site fire alarm systems are upgraded they will included visual alarms</p>

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
Physical and Architectural	All sites	Hospital's physical environment not necessarily accommodating for the unique needs of seniors.	Code Plus Environmental Assessment – the health care team examined over 100 aspects of the care environments across the St. Peters, General and Juravinski sites to determine whether they are senior friendly and are now identifying and implementing cost-effective standardized senior friendly equipment and procedures across all sites.
Physical and Architectural	Hamilton General Site	Elevators did not have voice notification of the floor arrived on or Braille for the visually impaired.	As site Elevator are upgraded they will include Braille and audio to indicate the floor and direction of travel. These upgrades have already occurred at WLMH, HGH, MUMC and JH. Other sites will come into current compliance as elevators are upgraded over time.
Physical and Architectural	Hamilton General Site	The Auditorium on site did not have automatic doors to access the nearest washroom.	Two automatic doors to be added to improve washroom access.
Physical and Architectural	Hamilton General Site	Main Entrance doors have wheelchair access button but identified as an area that needed to be more accessible as it is most often used. There are no curbs cut at the front door.	New doors to be added to main entrance, changed to a faster folding model, also will improve wheelchair access.

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
Physical and Architectural	Hamilton General Site – Emergency Trauma, Triage &	Renovation under design.	We will incorporate AODA guidelines.
Physical and Architectural	Orthopedic Clinic	Clinic to relocated to a new location at the HGH site	Design of the recently completed Orthopedic Clinic incorporated AODA planning guidelines including the addition of a barrier free accessible washroom.
Physical and Architectural	Juravinski Hospital	Ramp leading up to Main Entrance meets building codes but patients in wheelchairs find it to be too steep.	Facilities Management to identify alternate accessible entrance.
Physical and Architectural	McMaster University Medical Center – MAAC, Pain & Diabetes Clinics	This is a new renovation, issues addressed in design.	Design includes: wheelchair accessible counters at registration / care desks barrier free washrooms accessible doors
Physical and Architectural	Ron Joyce Children’s Health Center		New build complete in 2015, designed to meet current accessibility requirements
Physical and Architectural	Juravinski Cancer Centre - Breast Assessment Centre	New renovation, and issues are addressed in design.	Barrier free washrooms including automatic doors, wheelchair accessible reception counter, accessible seating in Waiting Room, automatic doors at main entrance.

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
Physical and Architectural	Hamilton General Hospital	Showers in BTU not accessible to patients in wheelchairs or bathing chairs.	New barrier free shower installed.
Physical and Architectural	McMaster University Medical Center	Doors not on automatic door operators	Main Entrance, 3B, 3C, 3G automatic door operators installed
Physical and Architectural	McMaster University Medical Center	Special needs adult diaper change station	Installed in 2G family washroom
Physical and Architectural	McMaster University Medical Center	Buttons not accessible to persons in wheelchairs	New button panels installed at barrier free heights in red 4 and yellow 2 bank elevators
Physical and Architectural	Juravinski Hospital	Buttons not accessible to persons in wheelchairs	New button panels installed at barrier free heights in J20 Wing, M Wing and L Wing main elevators
Physical and Architectural	Juravinski Hospital	24"x24" patio stones irregular and out of level (location of walkway???)	New concrete walkway poured
Physical and Architectural	St. Peter's	Showers not accessible to patients in wheelchairs or bathing chairs	New barrier free showers installed in 2 West, 3 West, 4 West and 4 East.
Physical and Architectural	St. Peter's	Counters not barrier free in Cafeteria	New barrier free design and accessibility.
Employment Standards	All sites	(Section 22) Must notify prospective internal and external job applicants that accommodations for applicants with disabilities will be provided on request.	Language has been updated and remains consistent with accessibility standards. Posting templates include the following language: Hamilton Health Sciences is an equal opportunity employer

Type of Barrier	Location	Description of Barrier	Strategy for Removal/Prevention
			<p>and we will accommodate any needs under the Canadian Charter of Rights and Freedom, Accessibility for Ontarians with Disabilities Act and the Ontario Human Rights Code. Hiring processes will be modified to remove barriers to accommodate those with disabilities, if requested. Should any applicant require accommodation through the application processes, please contact HR Services at 905-521-2100, Ext. 46947 for assistance. If the applicant requires a specific accommodation because of a disability during an interview, the applicant will need to advise the hiring manager when scheduling the interview and the appropriate accommodations can be made.</p>
Employment Standards	All sites	(Section 23) Employers must notify job applicants who are invited to an interview or selection process that accommodations are available on request. In addition, employers must consult with job applicants to identify the supports they might need.	<p>Practice has remained consistent with accessibility requirements. Applicants receive the following messages for all job submissions within Taleo.</p> <p>Hamilton Health Sciences is an equal opportunity employer and we will accommodate your needs under the Canadian Charter of Rights and</p>

			<p>in accordance to the related collective agreement articles where applicable. LR Coordinators gather information from HSW related to any existing accommodations in place for the employee and review accessibility needs when they meet with the employee regarding the redeployment.</p> <p><u>Elimination of a non-union position:</u> the HR Business Partner completes the non-union reassignment case review which details the employee’s current situation and history with additional considerations such as health concerns. This case review includes the questions “Is this an accommodated employee?” and allows for additional comments. The full review is provided to Employee and Labour Relations to take into consideration when searching for an appropriate reassignment.</p>

AODA Standards Education Plan 2020-2025

Standard	Affected	Education Modality
Information & Communications*	All staff, managers, physicians, volunteers	<p>All staff – complete e-learning once. See below for content:</p>  <p>presentation.doc</p> <p>For CSS/Nutrition – PPT presentation adapted from the HHS eLearning module</p>  <p>An Overview of the Accessibility for Ont</p> <p>For volunteers- Video is shown. Note that at the 3:19 mark, the volunteers are orientated to the AODA act and sign off on a consent thereafter stating they agree and will uphold compliance: https://vimeo.com/183008213/886ff3fcf4</p>
Design of Public Spaces	Managers	Minimal content (awareness) included in e-learning
Employment	All staff, managers, some physicians	<p>All staff – e-learning as above, with ppt for CSS and Nutrition staff delivered by project person for these departments.</p> <p>Includes some information on the Human Rights Code</p> <p>Note: Not applicable to Volunteers and most physicians</p>

Timeline

April -May 9, 2019	- Staff survey sent out to all HHS to identify gaps. May 9 survey closed. Results sent to committee. Staff self-identified gap in AODA training completion.
June 2019	E-learning content to be reviewed and updates completed.
June 2019	Reminder to HHS staff to mandatory AODA training requirement and to complete HHS AODA eLearning module if not already done.

Learning Objectives

Standard	Applicable Learning Objectives
Information & Communications	<ul style="list-style-type: none"> • Identify various disabilities (from Customer Service Standard e-learning) • Describe resources available to support people with disabilities, especially those specific to HHS (from Customer Service Standard e-learning) • Discuss what constitutes an exemption and what flexibility is allowed • Identify how a person with a disability can provide feedback
Design of Public Spaces	<ul style="list-style-type: none"> • Identify what could potentially be impacted (service counters, waiting areas, etc.)
Employment	<ul style="list-style-type: none"> • Identify the underlying principles based on the Ontario Human Rights Code • Describe how standards will impact recruitment, career planning and performance development processes on a staff and manager basis • Discuss what work accommodation is and what it means for staff, managers and others • Define what an accommodation plan is and what it contains (including emergency preparedness information) • Discuss how an individual staff member can request an accommodation plan <p>Note that HR, Client Services has developed a “story board” with applicable content related to the Employment Standard and has identified the various groups that will be affected. Content has been developed specifically for each group and the educational materials will be organized by target group.</p>

*Note: Although this standard includes Educational and Training Institutions, HHS is not considered a training institution as we do not grant degrees/diplomas and we are not governed by the Education Act or the Private Career Colleges Act. However, Clinical Practice & Education will be working with its education team to learn more about developing education and training

materials that are inclusive and accessible and how we can implement this as part of our educational activities for staff.

Hamilton Health Sciences Plan for Web Accessibility

Overview

The following is a breakdown of Hamilton Health Sciences (HHS) plan for meeting and maintaining the accessibility standards for its external and internal websites as determined by the the Accessibility for Ontarians with Disabilities Act, 2005 (AODA) and [Web Content Accessibility Guidelines](#) (WCAG).

Legal Responsibilities

Hamilton Health Sciences falls under the definition of Public sector organizations, businesses and non-profit organizations (50+ staff). With this classification, we are required to meet the following accessibility standards on the associated timelines.

- 2014 New public websites and web content must conform with WCAG 2.0 Level A.
- 2021 All public websites and web content posted after January 1, 2012, must conform with WCAG 2.0 Level AA other than criteria 1.2.4 (captions) and 1.2.5 (pre-recorded audio descriptions).

In regards to the 2014 deadline, The HHS Information and Communications Technology team (ICT) worked closely with internal stakeholders to ensure that any sites currently in development will meet these standards.

Most recently in 2018-19, HHS redeveloped its external website www.hamiltonhealthsciences.ca and conducted extensive testing – which was fully documented – to ensure it met WCAG 2.0 Level AA standards.

In addition, several external-facing websites which did not meet this level of certification were identified and subsequently decommissioned.

An additional component to our plan to raise compliance levels was the redressing of our intranet (Corp web). This site was redesigned and rebranded and the CMS was replaced with another CMS system Sharepoint – a widely-used online business application at HHS.

Associated Issue(s): Posting of Documents to the Web

In addition to making websites compliant to AODA standards, there is the related issue of making documents posted on the web equally accessible.

There are set steps recommended by WC3 to ensure documents are fully accessible and even offer step-by-step instructions for staff as they prepare documents for posting. These steps are available here: http://www.doi.gov/ocio/information_management/upload/Guide_for_Creating_Accessible_Documents.pdf

Implementing these guidelines will require staff education. We have brought this to the attention of not only website authors, but staff such as Patient Education, Corporate Communications, and any other team charged with posting documents that will not only be made available on our corporate intranet, but also there will be a highly visible cue on the homepage of the site alerting staff to the need for and location of this document.

Our Commitment

HHS did not wait until 2021 to implement these changes and have actively pursued accessibility standards across all phases of online publishing and will continue to do so in the months and years to come.

Further HHS hired a Web Content Specialist who has been thoroughly trained in the standard of AODA. Their presence will enhance the training already present on the HHS Web Team. They will continue to work in concert to ensure HHS is meeting the highest standards possible.

Planning for AODA Legislation and Multi-Year Plan

A steering committee is in place within the hospital with the mandate to assure that HHS meets the requirements under the Accessibility for Ontarians with a Disability Act (AODA 2005). The committee includes representation from HHS Communications & Public Affairs, Information Communication Technology, Facilities Management, Capital Development, Clinical Practice and Education, Human Resources, Emergency Preparedness, Patient Experience, Clinical areas and several community partners, to develop and monitor HHS's multiyear plan. This committee will establish working groups to address the requirements and oversee the implementation of the standards of the AODA, while providing leadership and oversight.

Communication of the Plan

Hamilton Health Sciences Accessibility Plan will be posted on the HHS web site.

The plan is posted on the Hospital's website (www.hamiltonhealthsciences.ca) in screen reader compatible format. It is also available through Communications & Public Affairs in Braille, large print or audio format upon request. Communications & Public Affairs can be reached at 905-521-2100 ext. 75387.

Review and Monitoring Process

The AODA Steering Committee will be responsible for ongoing monitoring and review of the implementation of improvements to provide enhanced service and access to persons with a disability. The Committee will also be responsible for approving corporate accessibility policies, procedures and communication materials as developed by the working groups.

Related Policies:

- Accessibility Policy
- Accessible Customer Service Policy
- Service Animal Policy
- Support Person policy
- Emergency & Disaster Management AODA Integration Policy

A copy of these policies is available upon request from the office of Patient Experience.
