

LYMPHEDEMA

WHAT YOU NEED TO KNOW

What is it?

Lymphedema is the swelling in a limb next to an area treated for cancer. The swelling is due to a build-up of lymphatic fluid.

Not everyone will develop lymphedema but a preventative approach is recommended.

- What should I look for?
- What can I do to prevent it?
- How is lymphedema managed?
- What support is available?

WHEN AND WHERE

Second Friday of every month
11am -12pm
Room 1-231

Past Clinic D, at end of hall
Level 1, JCC

See your clinic clerk to book you into the session
