Your prostate cancer symptoms matter to us!

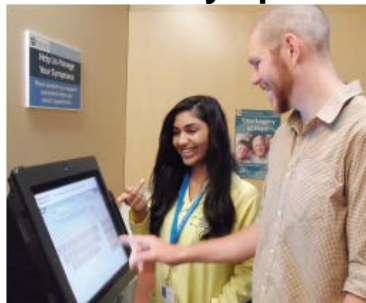

Symptom assessment is an important first step.

Before each visit with your cancer doctor please complete a symptom assessment. You will be asked to rate different symptoms you may have.

A staff person or volunteer will assist you if you need help at the computer kiosk.

By completing a symptom assessment, you will help us understand how you are feeling each time you come in. It will also show us how you feel compared to your past visits.

You can help us help you manage your symptoms.

PD 9736 – 06/2017

Brant - Burlington - Haldimand - Hamilton - Niagara - Norfolk
