

Internal Memo

Date: April 20, 2020

To: McMaster University Medical Centre

From: Kelly Falzon, Director Women's & Newborn Health and Site Administrator

Subject: **Covid-19 Preparedness- Women's Reproductive Health Clinic relocations**

As part of our ongoing efforts to respond to the COVID Pandemic, the following moves began on Friday, April 17th, 2020.

4B1, Maternal Fetal Medicine Clinic will move to 2F, the former footprint of Digestive Diseases and the Home TPN program.

The Women's Health Clinic, located on 4B1 will be relocated to 4F Surgery.

The moves are complete and the Maternal Fetal Medicine Clinic is functioning at full capacity. All referrals will continue to use the same phone/fax numbers and same procedures as previously set out for both clinics.

As we solidify plans for further actions or movements we will communicate them as soon as possible. Thank you all for your continued dedication to our patients and families, and to each other, as we navigate this challenging time.

If you have questions about the upcoming moves, please reach out to the Clinical Managers Lyndsay Martin-Kowalyk or Caroline Dunnett.
